Two New Generic Names in the Noctuidae (Lepidoptera)

Shigero SUGI

41-3, Akadutumi 5, Setagaya, Tokyo, 156 Japan

The present short notes are prepared to propose two new generic names for homonyms that have been found in my work for *Moths of Japan*.

Imosca **nom. n.**, gender feminine, from anagram of *Cosmia*, to replace *Allocosmia* SUGI, 1982, in INOUE *et al.*, *Moths of Japan* **1**: 776 & **2**: 372, with type-species *Dyrzela coreana* MATSUMURA, 1926, *Insecta Matsum.* **1**: 58, which is a junior homonym of *Allocosmia* COSSMANN, 1897, *Rev. crit. Paléozool.* **1**: 143 — Mollusca.

Euwilemania **nom. n.**, gender feminine, to replace *Wilemaniella* SUGI, 1982, in INOUE *et al.*, *Moths of Japan* **1**: 880 & **2**: 399, with type-species *Rivula angulata* WILEMAN, 1911, *Trans. ent. Soc. Lond.* **1911**: 267, which is a junior homonym of *Wilemaniella* MATSUMURA, 1927, *J. Coll. Agric. Hokkaido imp. Univ.* **19**: 20 — Insecta, Lepidoptera.

My grateful thanks are due to Mr. D. S. FLETCHER, British Museum (Natural History), for his kind information.

摘 要

ヤガ科の2新属名 (杉 繁郎)

私が先に日本産蛾類大図鑑のなかで提出した2つの属名が異物同名となることが判ったので、新名を与えた。従ってツマモンキリガの学名は *Imosca coreana* (MATSUMURA), **comb. n.**, ヒメエグリアツバの学名は *Euwilemania angulata* (WILEMAN), **comb. n.** として扱うことになる。
